

Gideon Onyegbula

Fullstack Developer

Lagos, Nigeria • devgideon.me • github.com/GFrosh • linkedin.com/in/gideon-onyegbula

SUMMARY

Passionate Fullstack Developer with hands-on experience building production web applications, REST APIs, and developer tooling. Comfortable across the stack — from React frontends to Node.js/Express backends and PostgreSQL databases. Currently a 3rd-year Software Engineering student at FUTO with a track record of shipping real projects used by satisfied clients.

TECHNICAL SKILLS

Frontend

React, TypeScript, HTML5, CSS3, PWA, Capacitor

Backend & APIs

Node.js, Express, REST APIs, PostgreSQL, Docker, Postman

Languages

TypeScript (primary), JavaScript, Python, C++

Tools

Git, GitHub, VS Code, Render

PROJECTS

Naija-Chronoscope

Nigerian History & Culture Blog | Vanilla JS → Next.js migration in progress

naijachronoscope.com

- Built and deployed a full content platform covering Nigerian history, culture, and news — live in production
- Implemented SEO from scratch: HTML meta tags, Open Graph, Twitter Cards, and structured data markup
- Migrated project to Next.JS to improve performance and server-side rendering for enhanced SEO.

Structura

Open-Source UML/ER Diagram Builder | TypeScript, Node.js, Docker

github.com/GFrosh/Structura

- Designed a form-based UI for generating UML and ER diagrams without code
- Built a custom SVG sequence diagram renderer to eliminate a heavy PlantUML dependency
- Dockerized the full application and authored a custom SVG logo and favicon for branding

TypeScript Chess Engine

AI Chess Opponent | TypeScript, Minimax, Alpha-Beta Pruning

github.com/GFrosh/Chess-Engine

- Implemented a fully functional chess engine in TypeScript with legal move generation and game state management
- Built a Minimax AI opponent with alpha-beta pruning for efficient game tree search

EDUCATION

B.Eng. Software Engineering

Federal University of Technology Owerri (FUTO)

Expected 2027/2028

- Coursework: Operating Systems, Data Management, Professional Ethics in Software Engineering

OTHER

- Built a WhatsApp chatbot integrating Claude AI via Node.js and the Meta WhatsApp Business API
- Developed a personal finance PWA with auto-categorization, localStorage persistence, and Nigerian locale support
- Active on GitHub (GFrosh), Dev.to, and LinkedIn — sharing projects and writing about software development
